

CLAIMS

What is claimed is:

- 5 1. A combination drink bottle, snack package and envelope, the combination comprising:  
a drink bottle providing a cylindrical bottle wall joined axially with a diminished  
diameter bottle neck, the bottle neck terminating at a removable bottle cap;  
a sealed snack package containing a snack food, the snack package adapted for being  
10 wrapped around the bottle neck of the drink bottle for intimate abutment therewith; and  
an envelope having a cylindrical envelope wall terminating with an aperture at one  
end thereof, the aperture adapted for accepting the bottle neck and for positioning an  
inner surface of the envelope wall intimately against the bottle wall for securement  
therewith, the envelope further enabled for pressing the snack package against the bottle  
neck, the envelope wall extending diametrically from the bottle wall no more than by the  
15 thickness of the envelope wall.
2. The combination of claim 1 wherein the envelope further comprises an annular cap sheath  
extending therewithin, the cap sheath adapted for frictional engagement with the bottle  
cap for securing the envelope to the drink bottle.
- 20 3. The combination of claim 1 further providing an adhesive layer positioned for joining the  
inner surface of the envelope to the cylindrical bottle wall for sealing the envelope.
4. The combination of claim 1 further providing an adhesive strip positioned for joining the  
25 envelope wall to the cylindrical bottle wall for sealing the envelope.
5. The combination of claim 1 wherein the envelope wall is spirally scored so as to enable  
peeling the envelope away from the drink bottle.

6. A combination drink bottle, snack package and envelope, the combination comprising:

a drink bottle providing a cylindrical bottle wall joined axially with a diminished diameter bottle neck, the bottle neck terminating at a removable bottle cap;

a sealed snack package containing a snack food, the snack package adapted for being wrapped over the bottle neck of the drink bottle for intimate abutment therewith; and

an envelope having a cylindrical envelope wall terminating with an aperture at one end thereof, the aperture adapted for accepting the bottle neck and for positioning an inner surface of the envelope wall intimately against the bottle wall for securement therewith, the envelope further enabled for pressing the snack package against the bottle neck, the envelope wall extending diametrically from the bottle wall no more than by the thickness of the envelope wall.

7. The combination of claim 6 further providing an adhesive layer positioned for joining the inner surface of the envelope to the cylindrical bottle wall for sealing the envelope.

8. The combination of claim 6 further providing an adhesive strip positioned for joining the envelope wall to the cylindrical bottle wall for sealing the envelope.

9. The combination of claim 6 wherein the envelope wall is spirally scored so as to enable peeling the envelope away from the drink bottle.

10. A combination drink bottle, snack package envelope, the combination comprising:

a drink bottle providing a cylindrical bottle wall joined axially with a diminished diameter bottle neck, the bottle neck terminating at a removable bottle cap; and

a sealed snack envelope adapted for receiving a snack food, the snack envelope having a cylindrical envelope outer wall terminating with an aperture at one end thereof, the aperture adapted for accepting the bottle neck and for positioning an inner surface of the envelope outer wall intimately against the bottle wall for securement therewith, the envelope further providing a concentrically oriented cylindrical inner wall enabled for

*Sub A91*  
~~engagement with the bottle neck, the snack envelope extending diametrically from the bottle wall no more than by the thickness of the outer envelope wall.~~

*A*  
*A* 5 11. The combination of claim 10 further providing an adhesive layer positioned for joining the inner surface of the <sup>snack</sup> envelope to the cylindrical bottle wall <sup>removable</sup> for sealing the envelope.

*A* 12. The combination of claim 10 further providing an adhesive strip positioned for joining the <sup>snack</sup> envelope wall to the cylindrical bottle wall for sealing the <sup>removable</sup> ~~envelope~~ <sup>openings of said aperture</sup>.

*Sub A101*  
~~13. The combination of claim 10 wherein the envelope wall is spirally scored so as to enable peeling the envelope away from the drink bottle.~~

*Sub A111*  
~~14. The combination of claim 10 wherein the enablement of the inner wall for engagement with the bottle neck is an inwardly radially directed protuberance.~~

*A* 15 15. The combination of claim 14 wherein the <sup>protuberance</sup> ~~protuberance~~ is an annular ridge.

*A* 16. The combination of claim 14 wherein the <sup>protuberance</sup> ~~protuberance~~ is a plurality of bosses.

*A* 20 17. The combination of claim 14 wherein the envelope has an access means positioned in opposition to the bottle cap so as to enable access to a snack food within the envelope.
